

# Laser or X-ray Alloy Gun?

What's Right for your Operation?

**Laser-based alloy sorting...**  
works on all types of alloys.

Best on Al, Mg alloys and red metals,  
Measures Li, Be, B, and X-ray can't.  
Plus, no radiation hassles.

**X-ray based alloy sorting...**  
works on all types of alloys.

Ultra small, lightest weight, fastest X-ray  
gun. Best on stainless and high temps.  
Great for turnings. Totally shielded  
detector to avoid punctures.

## We're going to make this easy

Try em both, and keep the one you *love*  
...or get a great deal on **both!**
